

What is the NASA Center for AeroSpace Information (CASI) ?

National Aeronautics and
Space Administration
Scientific and Technical
Information Program Office

The NASA Center for AeroSpace Information (CASI), in Maryland, has been at the core of the NASA Scientific and Technical Information (STI) Program for more than 35 years. Simply stated, CASI is a mixture of people and systems that interact to acquire, process, archive, announce, and disseminate STI.

All STI is input into the NASA STI Database—a worldwide database containing more than 3 million records. Records are managed in accordance with established procedures.

CASI offers a wide variety of services and products; NASA, government agencies, and contractors can register free of charge in order to benefit from the extensive worldwide collection of STI. CASI maintains a World Wide Web home page that also allows you to access information and products electronically.

Contact the NASA STI Help Desk at CASI for more information or to register for NASA STI services and products.

NASA STI FACT SHEET

CASI

- Acquires STI that is essential to NASA in avoiding duplication of research and maintaining U.S. preeminence in aerospace
- Acquires, processes, archives, announces, and disseminates NASA and worldwide STI
- Maintains the STI Database of more than 3 million bibliographic records
- Offers a wide array of electronic services and products via the Internet
- Provides free registration to NASA, government agencies, and contractors. Others may continue their visit on the STI home page
- Provides the NASA STI Help Desk to help you locate and obtain STI
